Introduction to reliability (Portsmouth Business School, April 2012)  $12. = 0.067 \times 0.075 = 0.005025$ . For the OR gate we add the probabilities to get the probability of the top event: Prob (Loss of electric power) = Prob (Loss of a.c. power) + Prob (Loss of d.c power) =  $0.005025 + 0.005 = 0.010025$ .

Course Overview. This interactive, practical course addresses the integration of a range of reliability initiatives into an asset management strategy. You'll discover the tools necessary to develop, implement, and sustain best in class maintenance and reliability programs. You'll learn the foundational elements your organisation needs in order to reduce reactive maintenance, downtime and maintenance costs with proven reliability methods.
