=== The Spotmatic was introduced by Asahi in 1964 and was the first camera to sell well with Through-the-Lens light metering. The camera was entirely mechanical apart from the light meter, which was powered by a 1.35 volt PX400 mercury cell. A small switch on the (photographer's) left side of the lens housing was pushed up to stop down the lens and activate the meter; the exposure controls would then be adjusted to centre a needle on the right edge of the viewfinder.
