The international financial value of Grand Prix racing has grown substantially in recent years. This book will focus upon the massive size, value, importance and impact of the industry. It will also investigate the dominance of UK based Research and Development and design and the development of team strategy and tactics. The authors have based their analysis upon very up-to-date research involving interviews with key individuals at the highest level and visibility within the industry and focus upon the key management themes of teamworking, leadership, strategy and innovation.

What Makes Learning Fun? presents a set of tested principles and strategies for the design of museum exhibits, with concrete examples of design successes and failures drawn from the author's many years in the field.

This new edition of the Manual is comprehensively updated to include the 2011, 2012 and 2013 World Championship winning Red Bull cars (the original book covers the 2010 RB6). In particular, the 'Anatomy' chapter, which includes details of developments introduced since the original book was published in June 2011, including KERS, DRS, developments due to rule changes concerning 'blown' diffusers, and the switch from Bridgestone to Pirelli tyres, as well as the change to 1.6-litre V6 turbocharged engines and the hybrid ERS (Energy Recovery System) introduced for the 2014 season.

The cars that disputed the 2019 World Championship are the protagonists of this annual, the first authored by Paolo Filisetti, an authoritative technical commentator and a contributor to leading Italian and international specialist magazines. Through a rich series of colour drawings, the author reveals all the secrets concealed beneath the bodywork of the various cars, while presenting, in parallel, race by race, the principal technical and racing facts and episodes to characterise the Formula 1 season. Aerodynamic configurations - such as the various modifications to the front wings - cockpits and steering wheels, engines, suspension components, brakes, air flows above and below the cars, everything is meticulously described and illustrated in a book indispensable for all those wanting to get beneath the skin of the fascinating world of Formula 1, as well as a useful reference work for specialists.

The author has come to some conclusions about the interaction of our Spiritual and human entities that he shares in Soothe Your Soul. The author describes the challenges of everyday life that are combining to keep us out of touch with the power of the Spirit within us all. He goes on to outline how we can identify and overcome those challenges and unlock the pathway to our true self – our Spiritual Being. This book seeks to add to the experience of those seeking answers and endeavoring to be more in touch with their Spirituality.

Enigmatic American Don Nichols, D-Day paratrooper, Army counter-intelligence officer and controversial entrepreneur, went on to create a racing marque that seems as cloaked as the man himself. Shadow was the only US-based team to win a Can-Am championship, and one of only three to score a victory in Formula 1. Yet history lavishly celebrates his nominal rivals Dan Gurney and Roger Penske, while Nichols has long remained, yes, a shadowy figure -- despite staying the difficult international course far longer, for 11 racing seasons, 1970 to 1980. But at last Pete Lyons, who was there in the day, lifts the veil from this secretive man and the innovative, extraordinary, magnificent racing cars and world-class team he created.

The Viper stunned Americans by showing that Dodge, whose cars were all front-wheel drive (and mostly powered by four-cylinder engines), could make a raw, brutal, V-10-powered car that could run with the best. Team Viper went a step further at Le Mans, proving that an American car could handle turns, too - so well that it won its class, repeatedly, at a fraction of the cost of the cars it beat. Dodge Viper covers the transition from a concept to a rough and brutal rocket to a world-class supercar, and includes every generation. The story also tells of the rough times when the entire Viper business could have been sold to the highest bidder, and considers alternative paths the 2013-17 Viper might have taken. This is not just a gushing tribute to the Dodge Viper, the author provides an objective view of the full story, using business, historical, and enthusiast perspectives. The book looks at the business case for each generation, the development stories and their outcomes, and describes some of the issues owners may have to watch out for, particularly in the early models.

Written from the perspective of the factory worker and peasant at the ground level, this study of Russia during the Revolution 1917-21 aims to shed light on the realities of living through and participating in these tumultuous events. The book is intended for undergraduate courses in history, Soviet studies, and politics.

In one moment Nicole Burns's life changes forever. The sound of gunfire at an Anne Frank exhibit, the panic, the crowd, and Nicole is no longer Nicole. Whiplashed through time and space, she wakes to find herself a privileged Jewish girl living in Nazi-occupied Paris during World War II. No more Internet diaries and boy troubles for Nicole-now she's a carefree Jewish girl, with wonderful friends and a charming boyfriend. But when the Nazi death grip tightens over France, Nicole is forced into hiding, and begins a struggle for survival that brings her face to face with Anne Frank. "This is a powerful and affecting story." (KLIATT)
