For the first time, a book exists that compiles all the information candidates need to apply for their first Chemical Engineer and Chemical Manufacturing Services job, or to apply for a better job. What you'll find especially helpful are the worksheets. It is so much easier to write about a work experience using these outlines. It ensures that the narrative will follow a logical structure and reminds you not to leave out the most important points. With this book, you'll be able to revise your application into a much stronger document, be much better prepared and a step ahead for the next opportunity. The book comes filled with useful cheat sheets. It helps you get your career organized in a tidy, presentable fashion. It also will inspire you to produce some attention-grabbing cover letters that convey your skills persuasively and attractively in your application packets. After studying it, too, you'll be prepared for interviews, or you will be after you conducted the practice sessions where someone sits and asks you potential questions. It makes you think on your feet! This book makes a world of difference in helping you stay away from vague and long-winded answers and you will be finally able to connect with prospective employers, including the one that will actually hire you. This book successfully challenges conventional job search wisdom and doesn't load you with useful but obvious suggestions ("don't forget to wear a nice suit to your interview," for example). Instead, it deliberately challenges conventional job search wisdom, and in so doing, offers radical but inspired suggestions for success. Think that "companies approach hiring with common sense, logic, and good business acumen and consistency?" Think that "the most qualified candidate gets the job?" Think again! Time and again it is proven that

For a period of history no women worked outside the home. But as years have gone by and society has changed, Women are working varying jobs every day. They are, however, underrepresented in some sectors of jobs. This includes women in the engineering and science fields. To matters worse, women do not ascend the career ladder as fast as or as far as men do. The impact of this and related problems for science, the academic enterprise, the U.S. economy, and global economic competitiveness have been recently examined. The Chemical Sciences Roundtable evaluate that the demographics of the workforce and the implications for science and society vary, depending on the field of science or engineering. The roundtable has organized a workshop, "Women in the Chemical Workforce," to address issues pertinent

Advances in Chemical Engineering

"The Keys to STEM and Beyond" presents STEM with a creative technological style that today's books lack. It was written with a creative five-dimensional design concept. Five-dimensions are smoothly embedded and integrated, offering a technological diversity that facilitates an array of different learning styles. Thus, easing the understanding and mastering of STEM concepts. Author Carlos E. Perez considers "The Keys to STEM and Beyond" to be a creative masterpiece in engineering pedagogy because it compiles years of research. It includes methodologies such as: how to achieve engineering ABET criteria in electrical engineering courses, as well as how to achieve all seven-levels of the Bloom's Taxonomy Plus. Without a doubt, "The Keys to STEM and Beyond" sets the tempo for new generations of authors: a paradigm shift in how books are written.
