degree polynomial is going to have n exactly n roots, or another way to think about it, there are going to be exactly n values for x , which will make this polynomial, make this expression on the right, be equal to zero.

The Fundamental theorem of Algebra (video) | Khan Academy
Consider the following two calculations: $(a+b)^2=(a+b)(a+b)$
 $=a^2+ab+ba+b^2=a^2+ab+ab+b^2$
 $=a^2+2ab+b^2$. $(a-b)^2=(a-b)(a-b)$
 $=a^2-ab-ba+b^2=a^2-ab-ab+b^2$
 $=a^2-2ab+b^2$. This leads us to two formulas that describe perfect square trinomials
The trinomials obtained by squaring the binomials
 $(a+b)^2=a^2+2ab+b^2$ and
 $(a-b)^2=a^2-2ab+b^2$.

Algebra is one of the broad parts of mathematics, together with number theory, geometry and analysis. In its most general form, algebra is the study of mathematical symbols and the rules for manipulating these symbols; it is a unifying thread of almost all of mathematics. How to make your Fundamentals of Algebra strong?

determining the concepts, skills, and topics to cover, we engaged dozens of highly experienced instructors with a range of student audiences. The resulting scope and sequence proceeds logically while allowing for a significant amount of flexibility in instruction. Chapters 1 and 2 provide both a review and foundation for study of Functions that begins in Chapter 3. The authors recognize that while some institutions may find this material a prerequisite, other institutions have told us that they have a cohort that need the prerequisite skills built into the course.
