Introduction to Parallel Processing: Algorithms and Architectures. Behrooz Parhami. This original text provides comprehensive coverage of parallel algorithms and architectures, beginning with fundamental concepts and continuing through architectural variations and aspects of implementation. Unlike the authors of similar texts, Professor Parhami reviews the circuit model and problem-driven parallel machines, variants of mesh architectures, and composite and hierarchical systems, among other ...

parallel processing. Some of the earliest parallel systems were designed by researchers in the field of fault-tolerant computing in order to allow independent multichannel computations and/or dynamic replacement of failed subsystems. These links are pointed out throughout the book. 5. Wide coverage of important topics.
