A tutorial and reference guide for users of Windows programs who want to add a full-featured CAD package to their Windows desktop. The book features a fully functioning copy of Autosketch for Windows, one of the most popular Windows-based CAD programs available.

Over 5,300 total pages MARINE RECON Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a highly trained six man team capable of conducting specific missions behind enemy lines. Employed as part of the Marine Air-Ground Task Force, reconnaissance teams provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team conduct depends on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include, but are not limited to: Plan, coordinate, and conduct amphibious-ground reconnaissance and surveillance to observe, identify, and report enemy activity, and collect other information of military significance. Conduct specialized surveying to include: underwater reconnaissance and/or

demolitions, beach permeability and topography, routes, bridges, structures, urban/rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized with other forces, equipment or personnel, assist in specialized engineer, radio, and other special reconnaissance missions. Infiltrate mission areas by necessary means to include: surface, subsurface and airborne operations. Conduct Initial Terminal Guidance (ITG) for helicopters, landing craft, parachutists, air-delivery, and re-supply. Designate and engage selected targets with organic weapons and force fires to support battlespace shaping. This includes designation and terminal guidance of precision-guided munitions. Conduct post-strike reconnaissance to determine and report battle damage assessment on a specified target or area. Conduct limited scale raids and ambushes. This text, now in its third edition, presents all common methods of computer/automated graphical construction most helpful to the engineering student, draftsman or designer, describing, in easy-to-understand terms, a wide range of hardware platforms that will run a single set of software options from the Autodesk Corporation. Rewritten and illustrated with over 330 tables, drawings and photographs, this is a vital reference for all mechanical, electrical and electronics, manufacturing, software, civil and architectural engineers; engineering designers and drafters, and industrial illustrators and artists. A definitive text on the subject for students familiar with LISP in undergraduate courses.
