families moved to Mount Vernon and revitalized area agriculture and commerce. The Mount Vernon Ladies Association bought the mansion and 200 acres from Washington's great-grandnephew in 1858 and continues to preserve the historic landmark to this day. The development of Route 1 and the George Washington Memorial Parkway in the 20th century contributed to today's economic development and growth in the Mount Vernon area. Neighborhoods and sites along the Potomac River are rife with history, including landmarks like the Woodlawn Plantation, Gum Springs, Pohick Church, Fort Belvoir, and Gunston Hall."

An important gateway suburban community, Mount Vernon was formed around the construction of two commuter rail lines to and from New York City. In the first quarter of the 20th century, its contiguous borders with Greater New York, rapid population growth, automobiles, petroleum, and industrial development set the stage for the encroachment of urban realities on the upwardly mobile founders' hopes for a sustained and prosperous suburban lifestyle. Through images that illustrate the power of 20th-century transportation technologies, new energy sources, and dynamic demographic forces on this "City of Happy Homes," *Mount Vernon Revisited* commemorates pivotal milestones of the past 150 years while offering indicators of the city's potential and identity.

laboring-class citizens. By the beginning of the 20th century, Mount Vernon was known as "the city of happy homes." It became a bedroom community for the region's most prominent upwardly mobile movers and shakers. Its ideal location to the city, elegant spacious homes, tree-lined streets, progressive schools and businesses, and receptivity to diversity spawned decades of sustained growth. Today Mount Vernon has become a critical gateway to New York and Westchester County. The images in Mount Vernon highlight the people and places that shaped the formative and golden years of the community, providing the quintessential look at the most dynamic small city in New York.

Images of America: Mount Vernon takes a visual excursion through the history of the home and neighborhood of our first president of the United States, George Washington. Washington's ancestors came to Northern Virginia over 320 years ago, and by 1786, he had acquired an 8,000-plus-acre tract of land surrounding Mount Vernon. Washington divided this acreage into five farms, which were considered his pride and joy. His detailed management of agricultural affairs, as well as his flair for entertaining, left a visual impression on all that visited. The region, from the late 17th century to Washington's death in 1799, continued to thrive. The estate has withstood and prospered during the selling of Mount Vernon and the surrounding properties, the establishment of the Quaker community in the 1840s, the Civil War, the arrival of the Army Corps of Engineers in 1915, and over 200 years of tourism. Through this volume, containing over 200 images of Mount Vernon and the

surrounding vicinity, readers will experience the area's rich history.

Situated along the Dan River, Danville is known historically as a major tobacco market in the 19th century. In 1865, Danville was chosen as the last capital of the Confederacy. Prosperity returned after the war with water-powered textile mills, which ushered in a 125-year legacy of Dan River Mills. Recently discovered images take the reader back in time to see Danville as it once was--a thriving boomtown on a major railroad line. Danville features graceful houses of worship along Millionaires Row and other architecturally significant landmarks. For more than a century, local photographers captured the everyday life of Danville through images of early businesses, schools, public transportation, and local disasters such as the Wreck of the Old 97 and the 1911 cyclone. Danville Revisited showcases the rich industrial and manufacturing history of this southern Virginia city.

Washington's Time Traveler Revisited by J. Howard Brown [-----]

The past remains essential - and inescapable. A quarter-century after the publication of his classic account of man's attitudes to his past, David Lowenthal revisits how we celebrate, expunge, contest and domesticate the past to serve present needs. He shows how nostalgia and heritage now pervade every facet of public and popular culture.

History embraces nature and the cosmos as well as humanity. The past is seen and touched and tasted and smelt as well as heard and read about. Empathy, re-enactment, memory and commemoration overwhelm traditional history. A unified past once certified by experts and reliant on written texts has become a fragmented, contested history forged by us all. New insights into history and memory, bias and objectivity, artefacts and monuments, identity and authenticity, and remorse and contrition, make this book once again the essential guide to the past that we inherit, reshape and bequeath to the future.
