There are also two types of combinations (remember the order does not matter now): Repetition is Allowed: such as coins in your pocket (5,5,5,10,10) No

Repetition: such as lottery numbers (2,14,15,27,30,33)

1. Combinations with Repetition. Actually, these are the hardest to explain, so we will come back to this later. 2. Combinations without Repetition

Combinations, on the other hand, are pretty easy going. The details don't matter. Alice, Bob and Charlie is the same as Charlie, Bob and Alice. Permutations are for lists (order matters) and combinations are for groups (order doesn't matter). A joke: A "combination lock" should really be called a "permutation lock".
