### Post-Jungian Criticism - SUNY Press

'Jungian and post-Jungian Clinical Concepts' was inspired by the challenge presented by the Jungian scholars and clinicians at the 'Spectre of the Other in Jungian Psychology,' an International Association of Jungian Studies conference that took place in Cape Town in 2017.

Carl Jung, perceived the human mind as made up of an unconscious divided into two discreet parts. The personal unconscious was those feelings that could not be accessed without therapy and dreamwork. The universal unconscious was a shared set of images, called archetypes, common to all people. The universal unconscious was expressed in art, literature and myth, and Jungian literary criticism focused specifically on the analysis of archetypes in literature and written mythology.

The POST-Jungian theory is based, not on Jung's cognitive modes, but rather on the team roles defined in JPTQ and my earlier e-book "Teamology". In addition to this formulation, essential for type counselors and individuals, there are two chapters for teamologists and team members.

Critics point out that Jung seems to have protected his theory from scrutiny by never settling on any specific explanations for evil. 3 Demonstrable Research Another major criticism of Jung's body of work is that it lacks demonstrable or measurable scientific research.

A critique of Jung's theories might also make us ask how we might entertain so-called "Jungian ideas" independent of his writing. This is the project undertaken by many groups such as the PAJA, though in such organizations one often sees a conflict between truth toward the source and a question of what direction to move forward, if that work isn't merely a collection of museum pieces.

Post-Jungian criticism seeks to contextualise, expand and modify Jung's original discourse on archetypes. Michael Fordham is critical of tendencies to relate imagery produced by patients to historical parallels only, e.g. from alchemy, mythology or folklore.

### **What is Jungian Criticism? - Bachelorandmaster**

Jungian criticism attempts to explore the connection between literature and what Carl Jung (a student of Freud) called the "collective unconscious" of the human race: "...racial memory, through which the spirit of the whole human species manifests itself" (Richter 504).

Frye frequently acknowledged his debt to Jung, accepted some of Jung's specifically named archetypes—"persona and anima and counsellor and shadow"—and referred to his theory as Jungian criticism (Anatomy 291), a practice subsequently followed in some hand books of literary terms and histories of literary criticism, including one edited by Frye himself, which obscured crucial differences and contributed to the confusion in terminology reigning today.

Rereads Jung in light of contemporary theoretical concerns, and offers a variety of examples of post-

Jungian literary and cultural criticism.

In *Jungian Literary Criticism: the essential guide*, Susan Rowland demonstrates how ideas such as archetypes, the anima and animus, the unconscious and synchronicity can be applied to the analysis of literature. Jung's emphasis on creativity was central to his own work, and here Rowland illustrates how his concepts can be applied to novels, poetry, myth and epic, allowing a reader to see their personal, psychological and historical contribution. This multidisciplinary and transdisciplinary approach challenges the notion that Jungian ideas cannot be applied to literary studies, exploring Jungian themes in canonical texts by authors including Shakespeare, Jane Austen and W. B. Yeats as well as works by twenty-first century writers, such as in digital literary art. Rowland argues that Jung's works encapsulate realities beyond narrow definitions of what a single academic discipline ought to do, and through using case studies alongside Jung's work she demonstrates how both disciplines find a home in one another. Interweaving Jungian analysis with literature, *Jungian Literary Criticism* explores concepts from the shadow to contemporary issues of ecocriticism and climate change in relation to literary works, and emphasises the importance of a reciprocal relationship. Each chapter concludes with key definitions, themes and further reading, and the book encourages the reader to examine how worldviews change when disciplines combine. The accessible approach of *Jungian Literary Criticism: the essential guide* will appeal to academics and students of literary studies, Jungian and post-Jungian studies, literary theory, environmental humanities and ecocriticism. It will also be of interest to Jungian analysts and therapists in training and in practice.

Since the publication of *Ghostwritten* (1999), David Mitchell has rapidly established himself as one of the most inventive and important British novelists of the 21st century. In this landmark study, Rose Harris-Birtill reveals the extent to which Mitchell has created an interconnected fictional world across the full run of his writing. Covering Mitchell's complete fictions, from bestselling novels such as *Cloud Atlas* (2004), *The Bone Clocks* (2014) and *number9dream* (2001), to his short stories and his libretti for the operas *Sunken Garden* and *Wake*, this book examines how Buddhist influences inform the ethical worldview that permeates his writing. Using a comparative theoretical model drawn from the Tibetan mandala to map Mitchell's fictional world, Harris-Birtill positions Mitchell as central to a new generation of post-secular writers who re-examine the vital role of belief in galvanizing action amidst contemporary ecological, political and humanitarian crises. *David Mitchell's Post-Secular World* features two substantial new interviews with the author, a chronology of his fictions and a selected bibliography of important critical writings on his work.

In this book, Steve Gronert Ellerhoff explores short stories by Ray Bradbury and Kurt Vonnegut, written between 1943 and 1968, with a post-Jungian approach. Drawing upon archetypal theories of myth from Joseph Campbell, James Hillman and their forerunner C. G. Jung, Ellerhoff demonstrates how short fiction follows archetypal patterns that can illuminate our understanding of the authors, their times, and their culture. In practice, a post-Jungian 'mythology' is shown to yield great insights for the literary criticism of short fiction. Chapters in this volume carefully contextualise and historicize each story, including Bradbury and Vonnegut's earliest and most imaginatively fantastic works. The archetypal constellations shaping Vonnegut's early works are shown to be war and fragmentation, while those in Bradbury's are family and the wholeness of the sun. Analysis is complemented by the explored significance of illustrations that featured alongside the stories in their first publications. By uncovering the ways these popular writers redressed old myths in new tropes—and coined new narrative elements for hopes and fears born of their era—the book reveals a fresh method which can be applied to all imaginative short stories, increasing understanding and critical engagement. *Post-Jungian Psychology and the Short Stories of Ray Bradbury and Kurt Vonnegut* is an important text for a number of fields, from Jungian and Post-Jungian studies to short story theories and American studies to Bradbury and Vonnegut studies. Scholars and students of literature will come away with a renewed appreciation for an archetypal approach to criticism, while the book will also be of great interest to practising depth psychologists seeking to incorporate short stories into therapy.

Luke Hockleys *Frames of Mind* introduces post-Jungian analytic psychology and explores how its theories can be applied to television and film. *Frames of Mind* contextualises post-Jungian theory in the media criticism canon and then goes on to explain the role and uses of analytical psychology in film and television criticism.

*Transcendent Writers in Stephen King's Fiction* combines a post-Jungian critical perspective of the puer aeternus. Offering new insight into King's work, it provides reconceptualisation of the eternal youth to develop a new theory: the concept of the transcendent writer. Combining recent Jungian and Post-Jungian developmental theories, this analysis of a selection of classic King novels addresses the importance of the stories within King's main narrative, those of King's writer-protagonists; an aspect often overlooked. Using these stories-within-stories, it demonstrates the way in which King's novels illustrate their young protagonist's trajectories into adulthood and delineates King's portrayal of the psychological development of adolescence and their ambivalent experience of the world. This book demonstrates how the act of writing plays a crucial role for King's writer-protagonists in their search for a stable identity, guiding us through their journey from disaffected youths to well-rounded adults. *Transcendent Writers in Stephen King's Fiction* will be of interest to Jungian and post-Jungian scholars, philosophers and teachers focusing on the theme of psychological development and identity, and to those studying literature with a particular interest in horror.

The *Routledge International Handbook of Jungian Film Studies* weaves together the various strands of Jungian film theory, revealing a coherent theoretical position underpinning this exciting recent area of research, while also exploring and suggesting new directions for further study. The book maps the current state of debates within Jungian orientated film studies and sets them within a more expansive academic landscape. Taken as a whole, the collection shows how different Jungian approaches can inform and interact with a broad range of disciplines, including literature, digital media studies, clinical debates and concerns. The book also explores the life of film outside cinema - what is sometimes termed 'post-cinema' - offering a series of articles exploring Jungian approaches to cinema and social media, computer games, mobile screens, and on-line communities. The *Routledge International Handbook of Jungian Film Studies* represents an essential resource for students and researchers interested in Jungian approaches to film. It will also appeal to those interested in film theory more widely, and in the application of Jung's ideas to contemporary and popular culture.

This second edition represents a wide-ranging critical introduction to the psychology of Carl Jung, one of the founders of psychoanalysis. Including two new essays and thorough revisions of most of the original chapters, it constitutes a radical assessment of his legacy. Andrew Samuels' introduction succinctly articulates the challenges facing the Jungian community. The fifteen essays set Jung in the context of his own time, outline the current practice and theory of Jungian psychology and show how Jungians continue to question and evolve his thinking and apply it to aspects of modern culture and psychoanalysis. The volume includes a full chronology of Jung's life and work, extensively revised and up to date bibliographies, a case study and a glossary. It is an indispensable reference tool for both students and specialists, written by an international team of Jungian analysts and scholars from various disciplines.
