SAIM will courier the question papers and scripts to the invigilator at a cost of R200; Past papers. Past papers are available on the SAIM website.

The Fifth SIAM International Conference on Data Mining continues the tradition of providing an open forum for the presentation and discussion of innovative algorithms as well as novel applications of data mining. Advances in information technology and data collection methods have led to the availability of large data sets in commercial enterprises and in a wide variety of scientific and engineering disciplines. The field of data mining draws upon extensive work in areas such as statistics, machine learning, pattern recognition, databases, and high performance computing to discover interesting and previously unknown information in data. This conference results in data mining, including applications, algorithms, software, and systems.

The Fourth SIAM International Conference on Data Mining continues the tradition of providing an open forum for the presentation and discussion of innovative algorithms as well as novel applications of data mining. This is reflected in the talks by the four keynote speakers who discuss data usability issues in systems for data mining in science and engineering, issues raised by new technologies that generate biological data, ways to find complex structured patterns in linked data, and advances in Bayesian inference techniques. This proceedings includes 61 research papers.

For trainers free additional material of this book is available. This can be found under the "Training Material" tab. Log in with your trainer account to access the material.The increasing complexity of the IT value chain and the rise of multi-vendor supplier ecosystems has led to the rise of Service Integration and Management (SIAM) as a new approach. Service Integration is the set of principles and practices, which facilitate the collaborative working relationships between service providers required to maximize the benefit of multi-sourcing. Service integration facilitates the linkage of services, the technology of which they are comprised and the delivery organizations and processes used to operate them, into a single operating model.SIAM is a relatively new and fast evolving concept. SIAM teams are being established in many organizations and in many different sectors, as part of a strategy for (out)sourcing IT services and other types of service.This is the first book that describes the concepts of SIAM. It is intended for: ITSM professionals working in integrated multi-sourced environments; Service customer managers, with a responsibility to secure the business supply of IT services in a multi-sourced environment; Service provider delivery managers with a responsibility to integrate multiple services to meet the demands of the customers business and users; Service provider managers with responsibilities to manage integrated services, participating in a multi-sourced environment.

This book represents the seventh edition of what has become an established reference work, MAJOR COMPANIES OF THE FAR EAST & AUSTRALASIA. This volume has been carefully researched and updated since publication of the sixth edition, and provides more company data on the most important companies in the region. The information in the book was submitted mostly by the companies themselves, completely free of charge. For the first time, a third volume has been added to the series, covering major companies in Australia and New Zealand. The companies listed have been selected on the grounds of the size of their sales volume or balance sheet or their importance to the business environment of the country in which they are based. The book will be updated and published every year. Any company that considers it is eligible for inclusion in the next edition of MAJOR COMPANIES OF THE FAR EAST & AUSTRALASIA, should write to the publishers. No charge whatsoever is made for publishing details about a principal Asian company. Whilst the publishers have taken every care to ensure accurate reporting of the company information contained in this book, no liability can be accepted by either the publishers, their editorial staff, or their distributors for any errors or omissions, nor for the consequences thereof. Graham & Trotman Ltd is a member of the Kluwer Academic Publishers Group and publishes over 450 business and technology books. A catalogue is available on request.

There are competing theories to explain the reasons behind the international competitiveness of manufacturing in Asia. Analysing these different theories will bring important lessons, not just for Asia, but for developing economies the world over. This lucid book studies industries and firms in East Asia and examines the major determinants of their economic performance. With contributions from such leading thinkers as Ha-Joon Chang and Rajah Rasiah, the book covers such themes as: *industrial policy and East Asia *Taiwan's information technology industry *The role of the government in technological capability building Manufacturing Competitiveness in Asia touches on many important themes and issues and as such will be of great interest to students, academics and policy-makers involved in industrial economics, international trade and Asian studies.

Service Integration and Management (SIAM™) Foundation Body of Knowledge (BoK), Second edition has been updated to reflect changes to the market and is the official guide for the EXIN SIAM™ Foundation certification. Prepare for your SIAM™ Foundation exam and understand how SIAM can benefit your organization!

From the January 2003 symposium come just over 100 papers addressing a range of topics related to discrete algorithms. Examples of topics covered include packing Steiner trees, counting inversions in lists, directed scale-free graphs, quantum property testing, and improved results for directed multicut. The papers were not formally refereed, but attempts were made to verify major results. Annotation (c)2003 Book News, Inc., Portland, OR (booknews.com)
