### Chapter 1 Section 4: Sea Floor Spreading

Flashcards | Quizlet

To map the ocean floor  
we need to know the  
depth at a number of  
places. The process of  
measuring the depths is  
known as bathymetry.

These measurements

were first made through soundings, where a weighted line (lead line) was let out by hand until it touched the bottom, and the depth could be recorded from the length of the line (Figure 1.4.1). This technique led to the fathom as a unit of depth; as sailors hauled in the sounding line they would stretch it out to cover their arm

Spreading Flashcards |  
Quizlet

Sea-floor spreading begins at a mid-ocean ridge, which forms along a crack in the oceanic crust. Along the ridge, molten material that forms several kilometers beneath the surface rises and erupts. At the same time, older rock moves outward on both sides of the ridge.

## PDF Section 1 4

The theory of plate tectonics explains the formation, movement, and subduction of Earth's plates. Earth's lithosphere is broken into plates that are in constant motion. These plates float on the asthenosphere due to convection currents. This theory incorporates both the theory of continental drift and the
