Incentives provided by European governments have resulted in the rapid growth of the photovoltaic (PV) market. Many PV modules are now commercially available, and there are a number of power electronic systems for processing the electrical power produced by PV systems, especially for grid-connected applications. Filling a gap in the literature, Power Electronics and Control Techniques for Maximum Energy Harvesting in Photovoltaic Systems brings together research on control circuits, systems, and techniques dedicated to the maximization of the electrical power produced by a photovoltaic (PV) source. Tools to Help You Improve the Efficiency of Photovoltaic Systems The book supplies an overview of recent improvements in connecting PV systems to the grid and highlights various solutions that can be used as a starting point for further research and development. It begins with a review of methods for modeling a PV array working in uniform and mismatched conditions. The book then discusses several ways to achieve the best maximum power point tracking (MPPT) performance. A chapter focuses on MPPT efficiency, examining the design of the parameters that affect algorithm performance. The authors also address the maximization of the energy harvested in mismatched conditions, in terms of both power architecture and control algorithms, and discuss the distributed MPPT approach. The final chapter details the design of DC/DC converters, which usually perform the MPPT function, with special emphasis on their energy efficiency. Get Insights from the Experts on How to Effectively Implement MPPT Written by well-known researchers in the field of

photovoltaic systems, this book tackles state-of-the-art issues related to how to extract the maximum electrical power from photovoltaic arrays under any weather condition. Featuring a wealth of examples and illustrations, it offers practical guidance for researchers and industry professionals who want to implement MPPT in photovoltaic systems.

Extremely useful for UPSC, IAS, PCS, Civil Services, SSC, IBPS, UGC, CBSE, CLAT, related Govt Recruitment Exams

Structured and developed for both class room use and self learning, this updated edition is a must buy for aspirants who are preparing for various competitive examinations. The questions have now been segregated by topic and new questions from 'Previous Years' Question Papers' of key examinations have been added for effective preparation. The topics are covered in a thorough fashion with presentation of facts and recent updates spread across Politics, Economy, Science & Technology and National & International Affairs. The book is divided into four Parts 'The World', Science, India and Current Affairs. As an additional feature a 32 page multicolor section containing maps of the world, India and its various physical, geographical and political make up is included along with the book.

This report presents both short- and long-term approaches to the problem of marine plastic debris and micro plastics. It provides an overview of the latest science and experiences, identifies priority areas of action, and points out areas requiring more research. Improved waste management is urgently needed to reduce the flow of plastic into our oceans.

Our brand-new resources are written specifically to tackle the demands of the GCSE (9-1) Maths.

1. The book is designed for preparation of civil services exams 2. It is divided into 4 papers and segmented into topics. 3. Last 5 Years solved papers are given to understand the changing paper. 4. Chapterwise Questions are provided from 2020 to 1997 for practice. 5. Solved Papers 2020-2017 are given for practice. Candidates, who are appearing in IAS Main Exams, are always in need of comprehensive and accurate study material which could actually serve the purpose for the smart and cumulative understanding of the subject. General Studies is a very dynamic topic which requires in depth analysis and vast knowledge. With the current edition of "IAS Mains General Studies Chapterwise Solved Papers 2020-1997" candidates are guided with the authentic source of information following the current paper pattern. The book is divided into 4 Parts providing complete practice of each paper. Every chapter is loaded with good number of questions from 1997 to 2020 along with detailed solutions. Solved Papers (2020-2017) are provided to get the better insight of the question papers and its pattern. TOC Solved Paper 2020-2017 (Paper - I, II, III, IV), Paper I – Indian Heritage and Culture, History and Geography of the World and Society, Paper II – Governance, Constitution, Polity, Social Justice and International Relations, Paper III – Technology, Economic Development, Biodiversity, Environment, Security and Disaster Management, Paper IV – Ethics, Integrity and Aptitude.

This book contains the proceedings of the International Symposium on the Mechanisms of Sexual Reproduction in Animals and Plants, where many plant and animal reproductive biologists gathered to discuss their recent progress in investigating the shared mechanisms and factors involved in sexual reproduction. This now is the first book that reviews recent progress in almost all fields of plant and animal fertilization. It was recently reported that the self-sterile mechanism of a hermaphroditic marine invertebrate (ascidian) is very similar to the self-incompatibility system in flowering plants. It was also found that a male factor expressed in the sperm cells of flowering plants is involved in gamete fusion not only of plants but also of animals and parasites. These discoveries have led to the consideration that the core mechanisms or factors involved in sexual reproduction may be shared by animals, plants and unicellular organisms. This valuable book is highly useful for reproductive biologists as well as for biological scientists outside this field in understanding the current progress of reproductive biology.
